PINKERTON CRIME INDEX

To forecast crime, we use state-of-the-art machine learning algorithms that ingest evidence of past crime from federal crime statistics, local police data, and victim and offender surveys, together with a wide variety of slow and fast-moving crime-causing variables. The variables employed for prediction are suggested by leading theories from criminology, including the premise that crime requires the coincidence of three factors: a suitable target, a motivated offender and the absence of capable guardianship.

Pinkerton's US Crime Report tracks total crime, violent crime, and property crime at the neighborhood scale for all fifty states. For each crime category, the index expresses risk as a multiple of the national-average level. A score of 1.0x indicates average risk, while a score of 2.0x indicates twice-average risk. Forecasts include a 95% confidence band constructed using overall model accuracy during an out of sample test period.

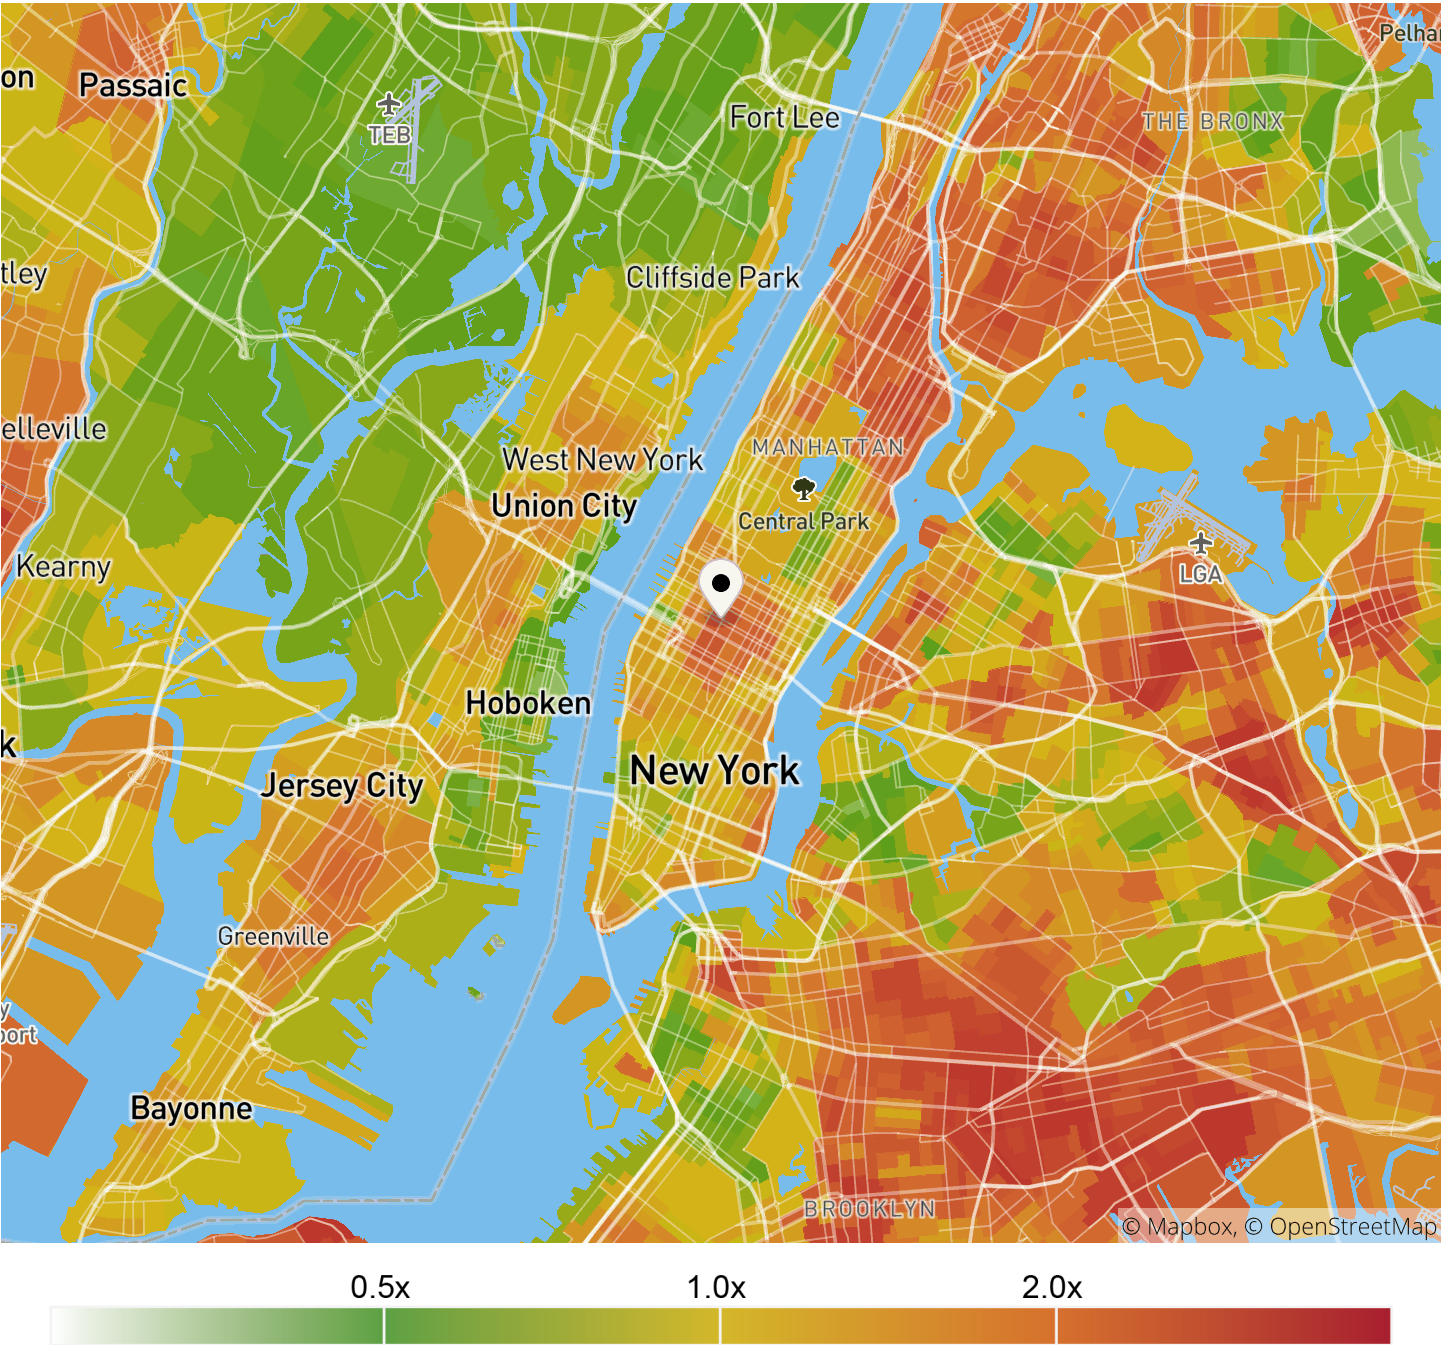

TOTAL CRIME RISK: NEIGHBORHOOD SCALE

CRIME SCORE

2.3x

Total crime risk in your neighborhood is 2.3 times the national average. The map shows total crime risk for a set of neighborhoods surrounding your address. Light shades of green indicate low crime risk, while yellow, orange and red indicate areas with increasingly higher risk. We use observed crime counts in space together with data on a wide variety of neighborhood characteristics to estimate crime risk at a finer spatial scale. Your address is indicated by the white and black marker.

ADDRESS: TIMES SQUARE, NEW YORK

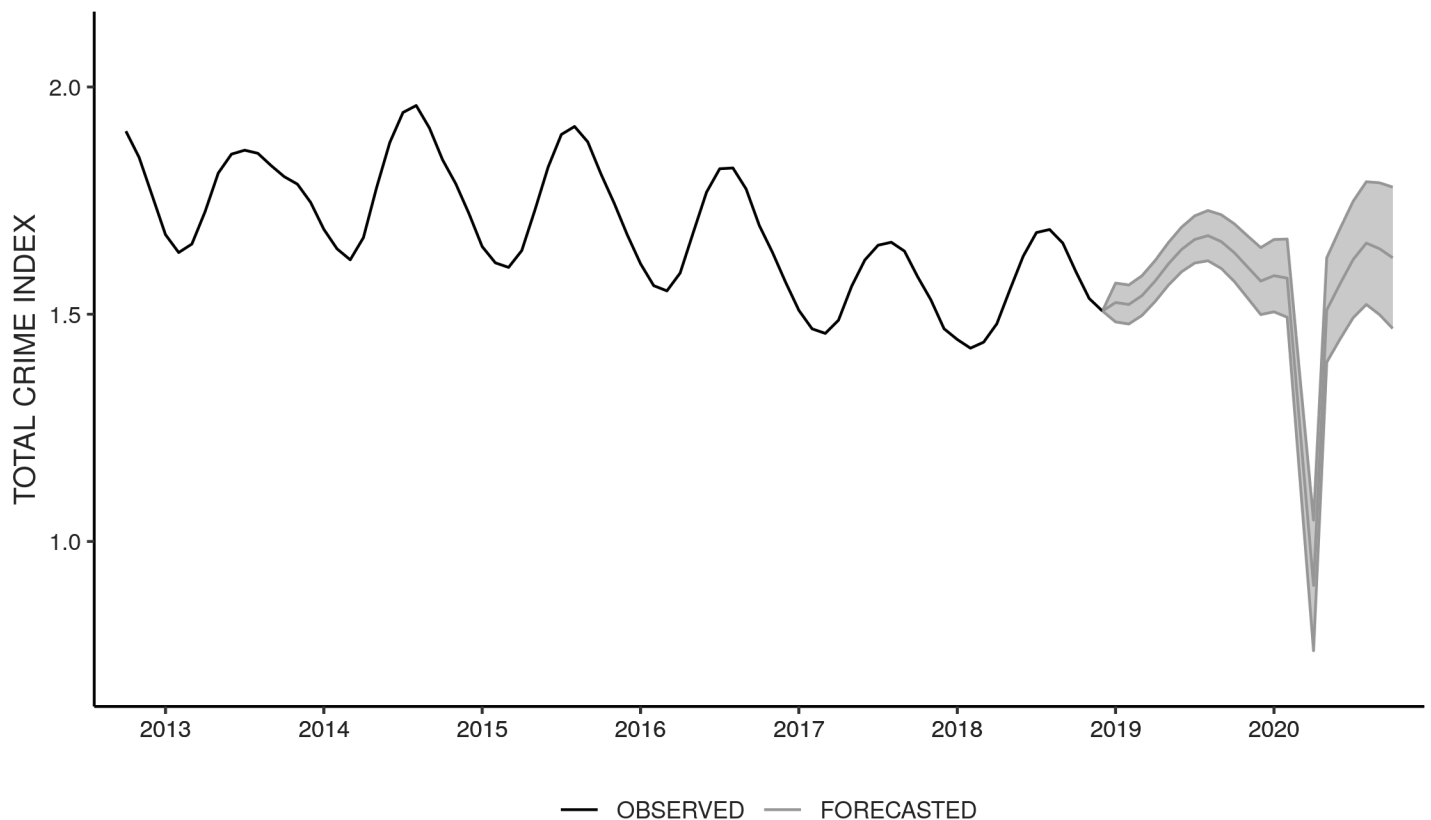

TOTAL CRIME RISK: COUNTY SCALE

CRIME SCORE

1.6x

Zooming out, your address is situated in New York County. Total crime risk in New York County is 1.6 times the national average. The graph plots past and (forecasted) future total crime risk in your county. The shaded area shows the 95-percent confidence band for forecasted risk.

NEW YORK COUNTY TOTAL CRIME RISK OVER TIME

YEAR-OVER-YEAR CHANGE

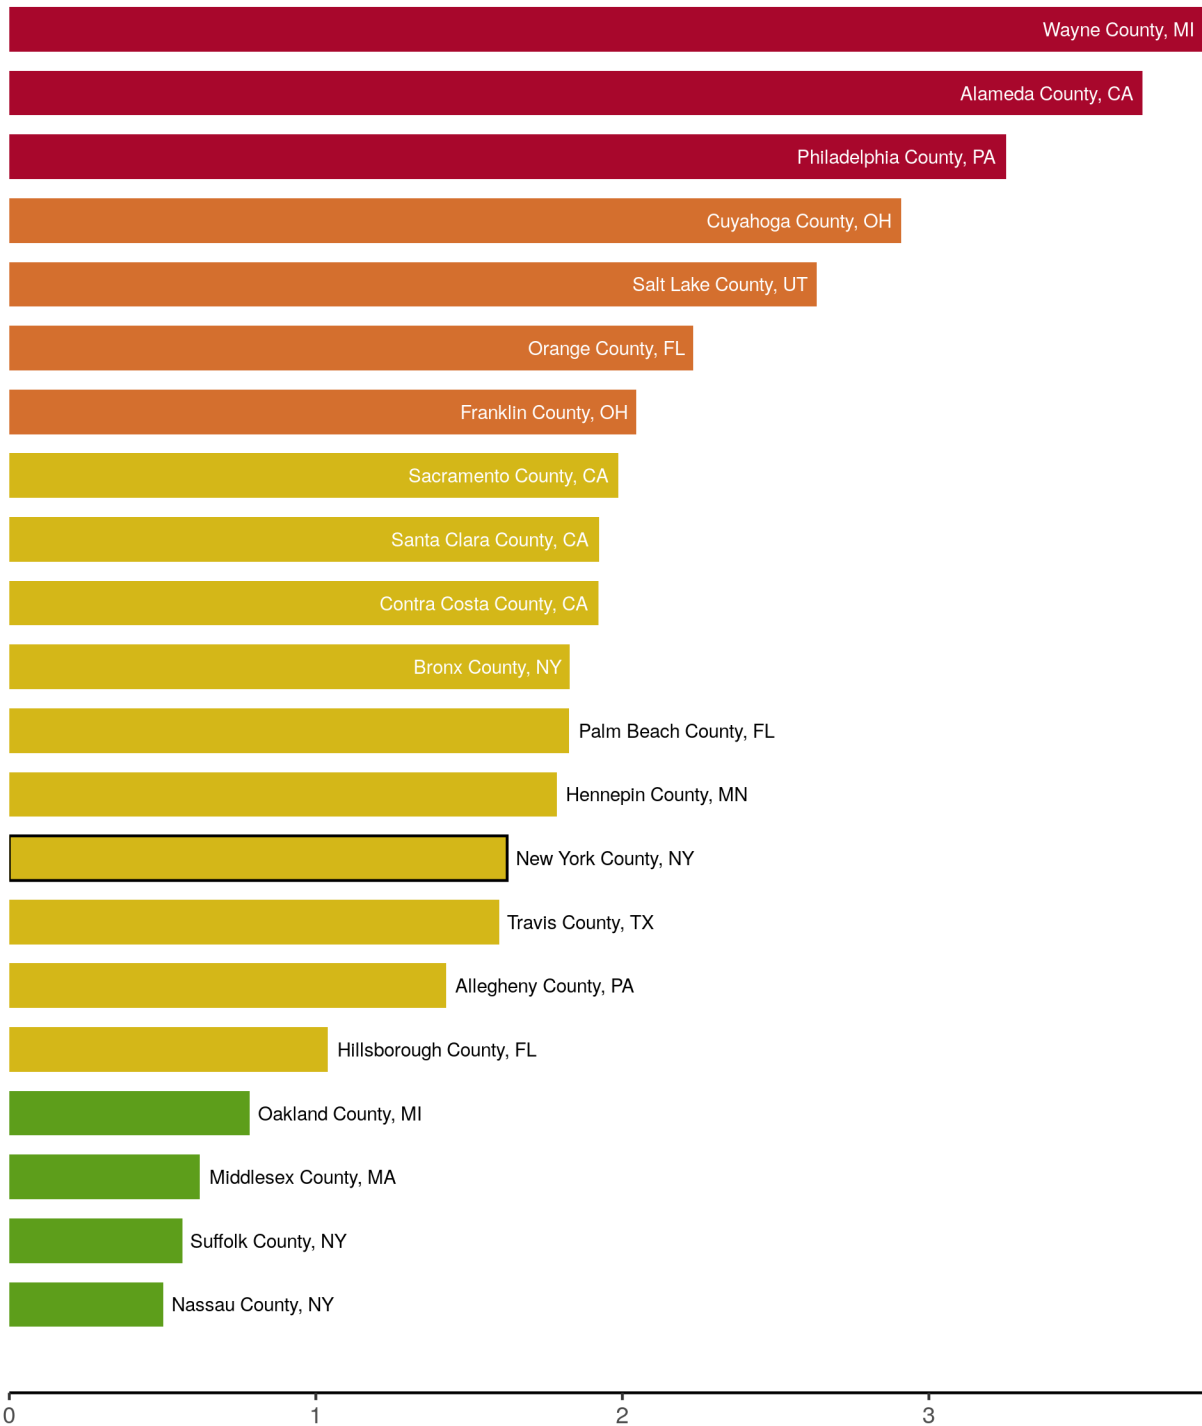

Total crime risk in New York County has **decreased by 1%** over the last year.

PERCENTILE RANK

77 percent of U.S. counties have lower total crime risk than New York County.

TOTAL CRIME RISK: PEER COMPARISON

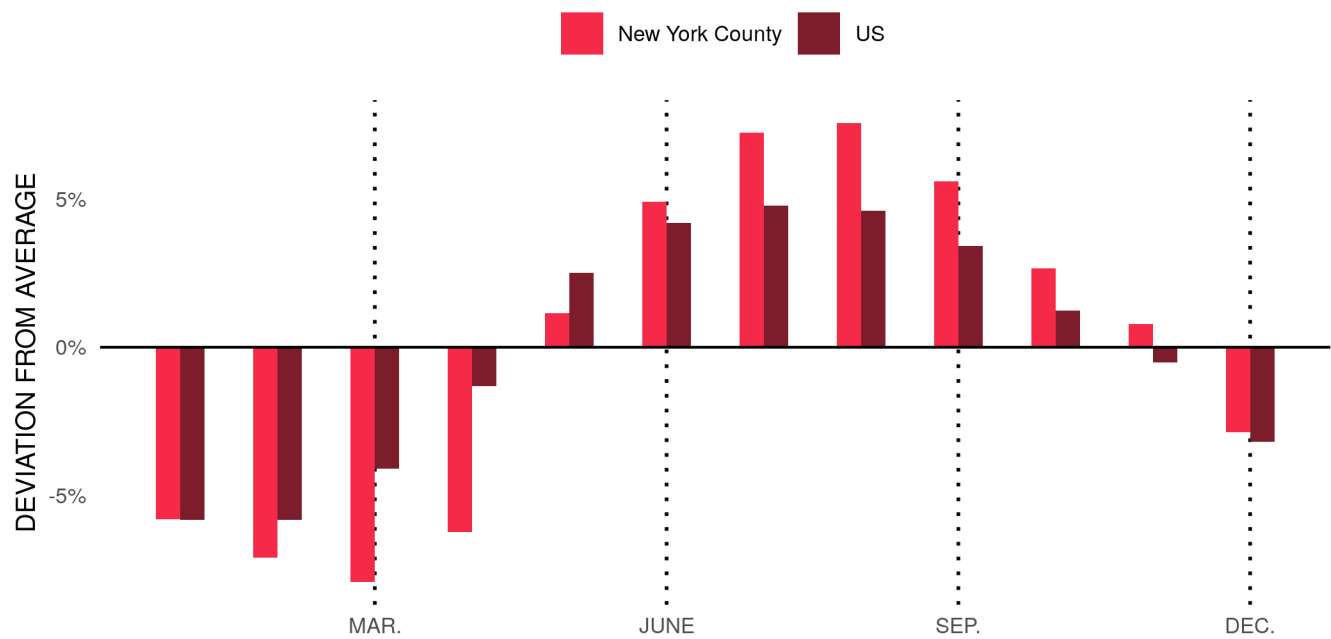

We compare total crime risk in New York County with similar sized counties based on population level. The figure shows total crime risk in New York County alongside 20 peers, sorting counties from highest to lowest risk. New York County has the 8th lowest crime risk in the group.

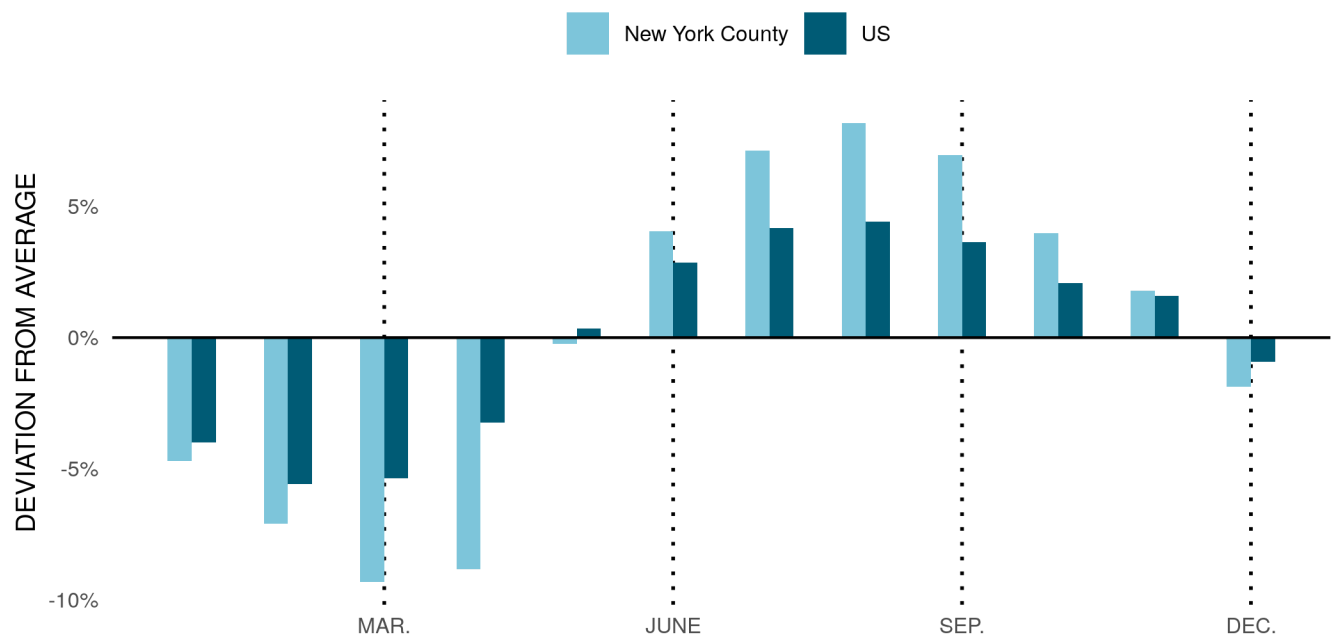

SEASONAL STRUCTURE OF CRIME

In many areas in the US, crime exhibits strong seasonality. The figures decompose this structure for both New York County and the national-average. Negative values indicate lower-than average crime months. Positive values indicate higher-than average crime months.

VIOLENT CRIME

PROPERTY CRIME

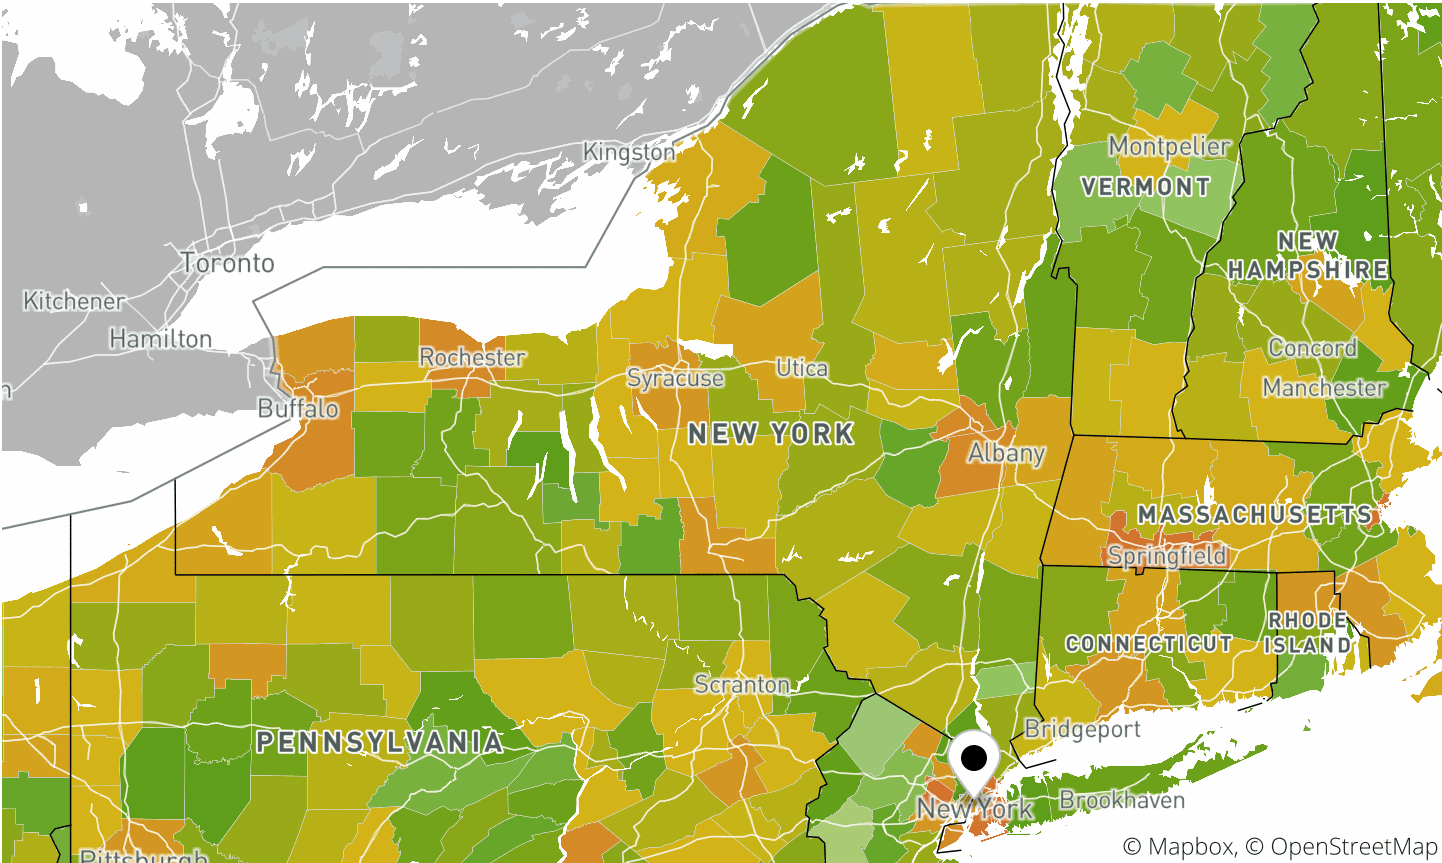

TOTAL CRIME RISK: STATE SCALE

CRIME SCORE

1.4x

Total crime risk in New York is 1.4 times the national average. The map shows total crime risk for the surrounding counties that make up your state. Light shades of green indicate low crime risk, while yellow, orange and red indicate areas with increasingly higher risk. Your address is indicated by the white and black marker.

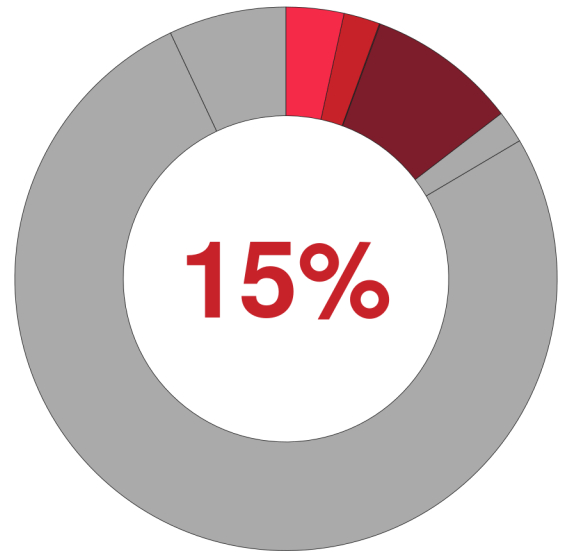

YEAR-OVER-YEAR CHANGE

The bars show percent change of total, violent, and property crime risk in New York over the past year.

Total Violent Property

VIOLENT CRIME

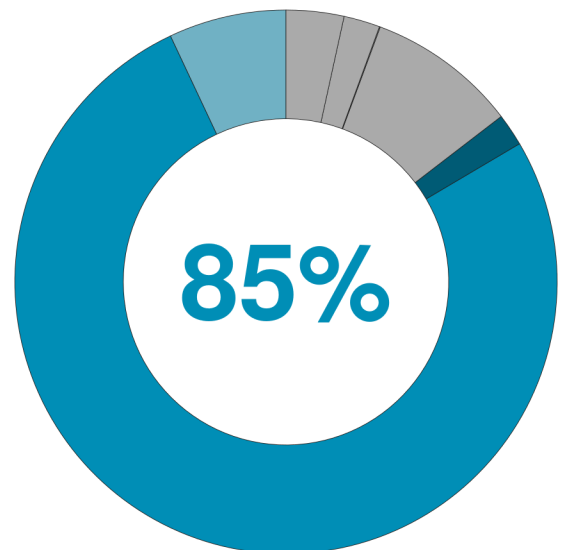

15 percent of all crimes in New York are violent. This includes assault, murder, rape, and robbery. Assault is the largest subcategory of violent crime in the state.

Assault Murder Rape Robbery

PROPERTY CRIME

85 percent of all crimes in New York involve damage or theft of property. This includes burglary, larceny and motor vehicle theft. Larceny is the largest subcategory of property crime in the state.

Burglary Larceny MV Theft

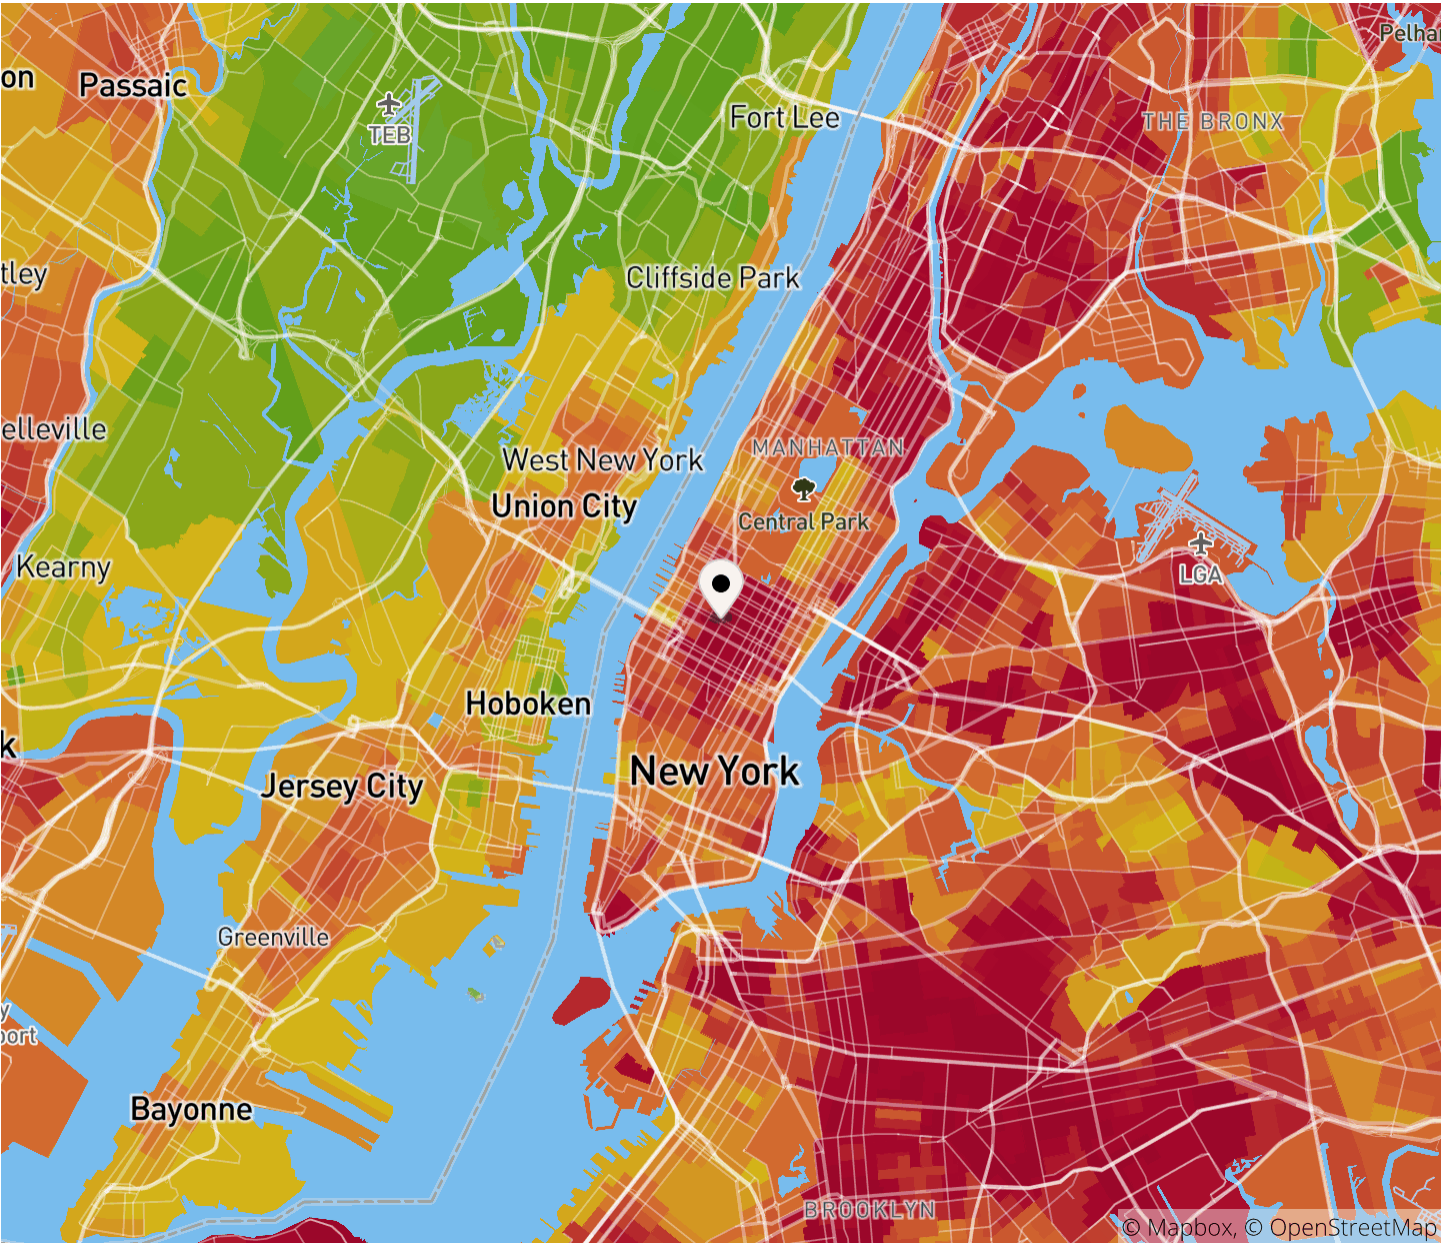

VIOLENT CRIME RISK: NEIGHBORHOOD SCALE

CRIME SCORE

4.9x

Violent crime risk in your neighborhood is 4.9 times the national average. In the map, light shades of green indicate low crime risk, while yellow, orange and red indicate areas with increasingly higher risk. Your address is indicated by the white and black marker.

ADDRESS: TIMES SQUARE, NEW YORK

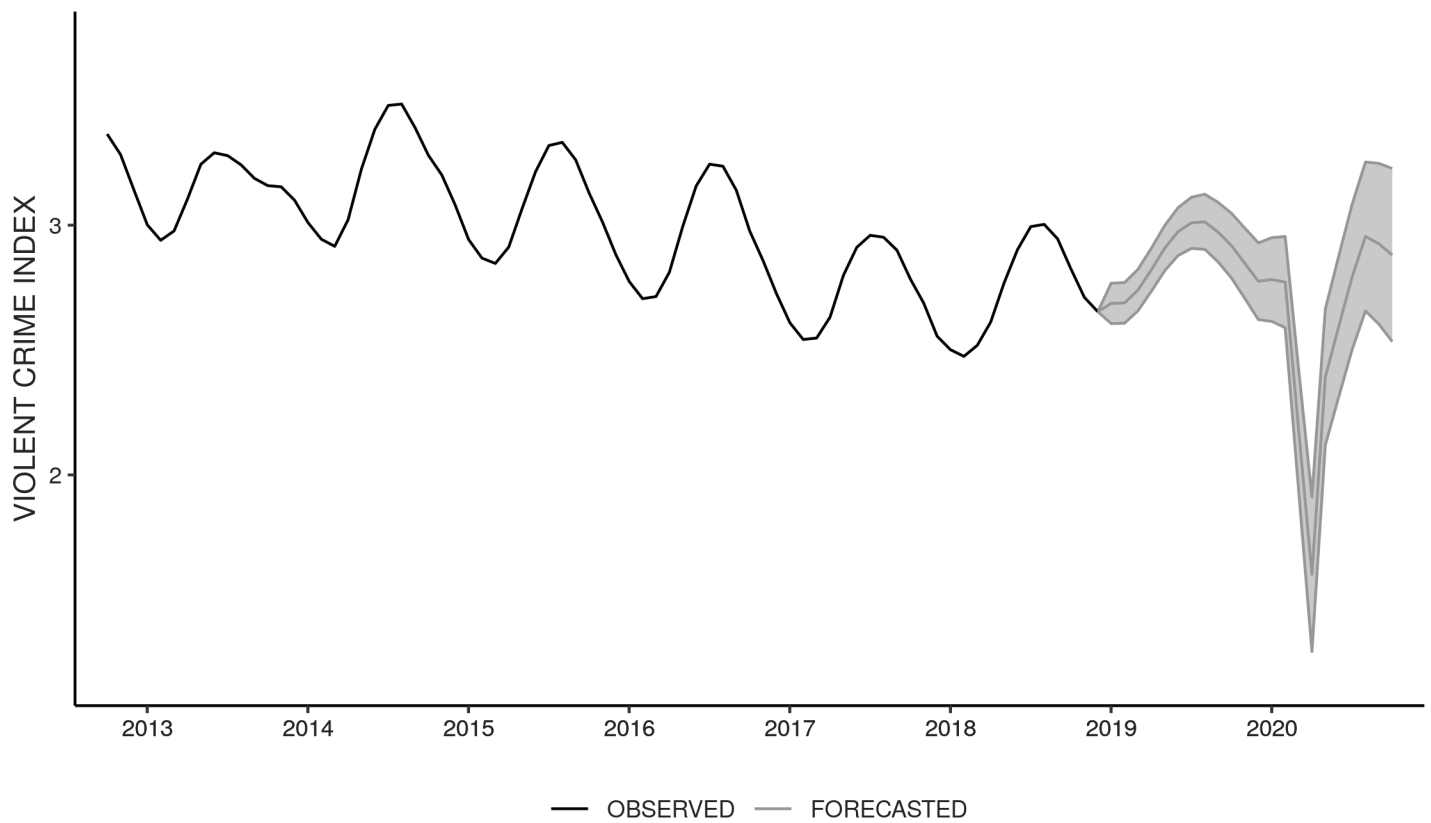

VIOLENT CRIME RISK: COUNTY SCALE

CRIME SCORE

2.9x

Violent crime risk in New York County is 2.9 times the national average. The graph plots past and (forecasted) future violent crime risk in the county. The shaded area shows the 95-percent confidence band for forecasted risk.

NEW YORK COUNTY VIOLENT CRIME RISK OVER TIME

YEAR-OVER-YEAR CHANGE

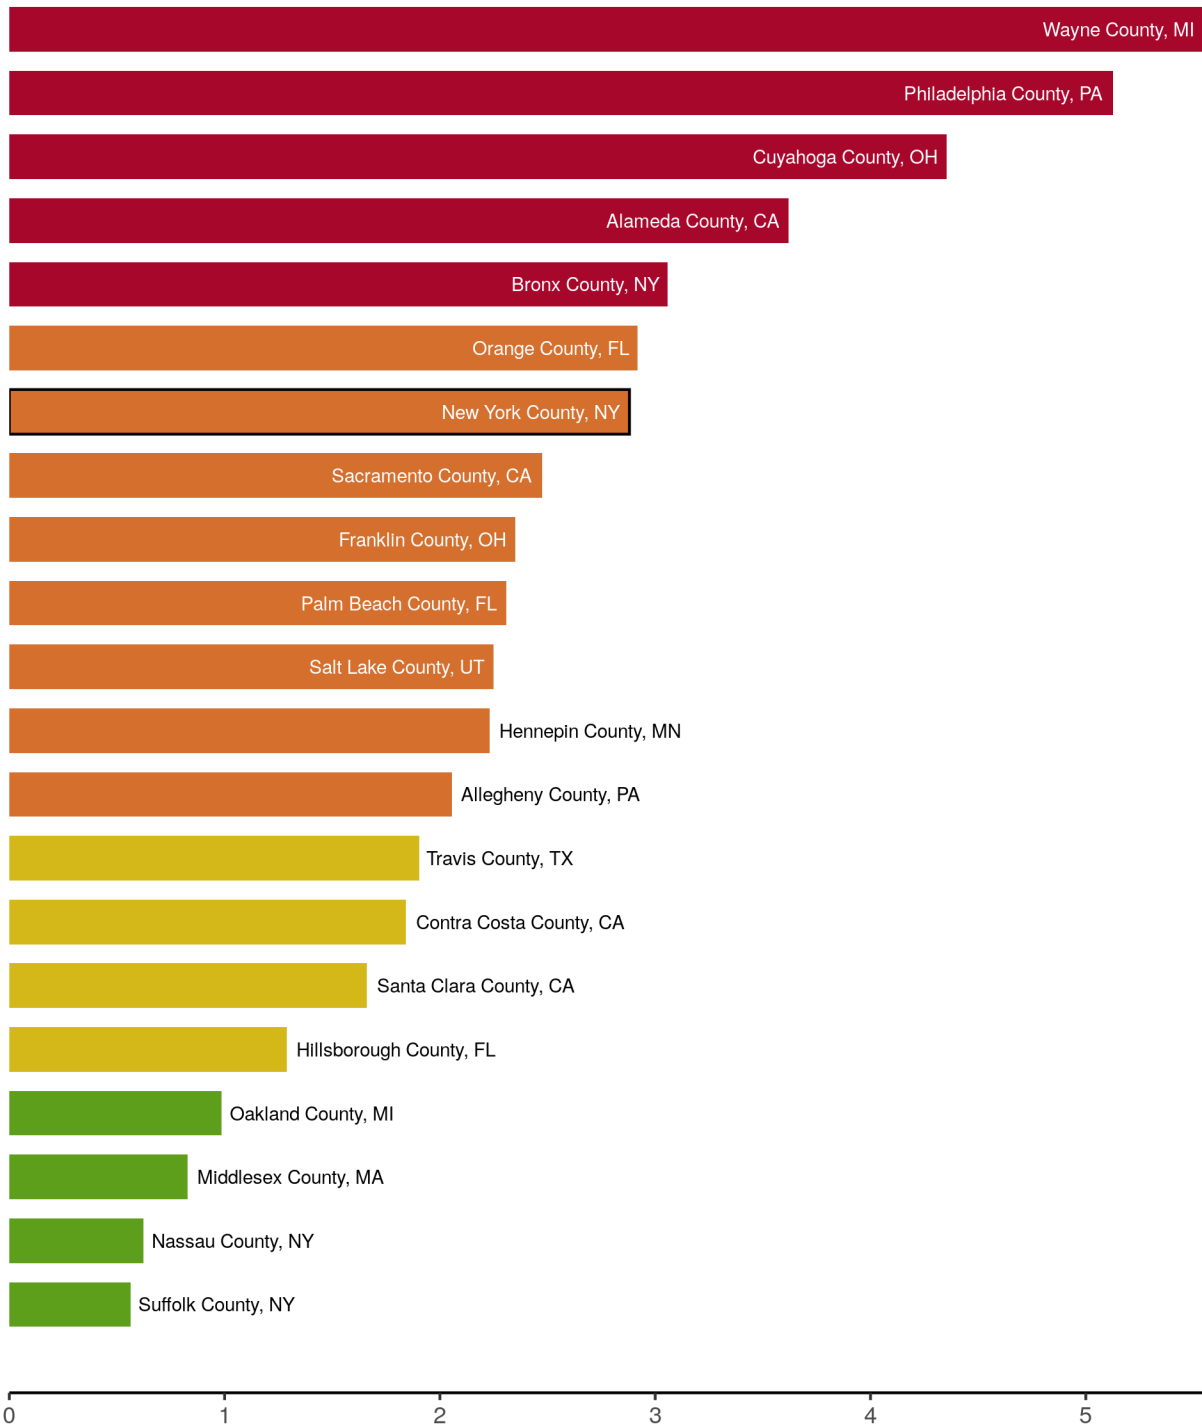

Violent crime risk in New York County has **decreased by 1%** over the last year.

PERCENTILE RANK

88 percent of U.S. counties have lower violent crime risk than New York County.

VIOLENT CRIME RISK: PEER COMPARISON

The figure plots violent crime risk in New York County alongside 20 peers, sorting counties from highest to lowest risk. New York County has the 7th highest crime risk in the group.

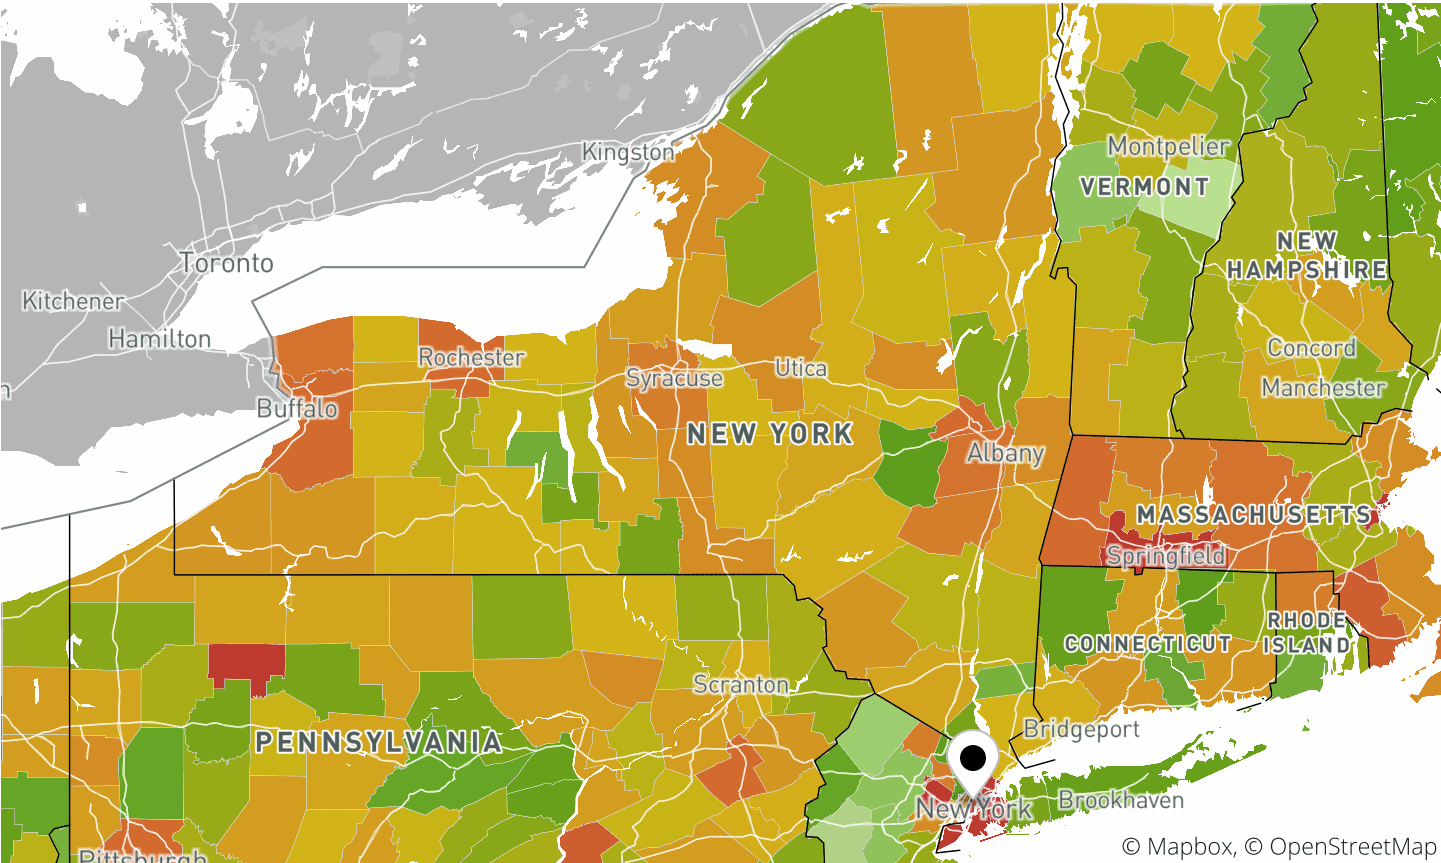

VIOLENT CRIME RISK: STATE SCALE

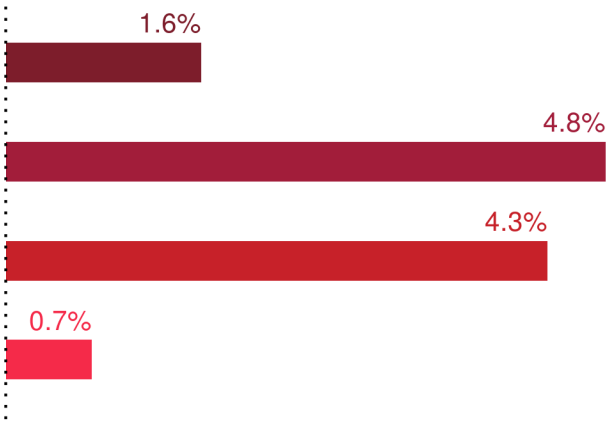

CRIME SCORE

2.1x

Violent crime risk in New York is 2.1 times the national average. In the map, light shades of green indicate low crime risk, while yellow, orange and red indicate areas with increasingly higher risk. Your address is indicated by the white and black marker.
