# PINKERTON CRIME INDEX

To forecast crime, we use state-of-the-art machine learning algorithms that ingest evidence of past crime from federal crime statistics, local police data, and victim and offender surveys, together with a wide variety of slow and fast-moving crime-causing variables. The variables employed for prediction are suggested by leading theories from criminology, including the premise that crime requires the coincidence of three factors: a suitable target, a motivated offender and the absence of capable guardianship.

Pinkerton's US Crime Report tracks total crime, violent crime, and property crime at the neighborhood scale for all fifty states. For each crime category, the index expresses risk as a multiple of the national-average level. A score of 1.0x indicates average risk, while a score of 2.0x indicates twice-average risk. Forecasts include a 95% confidence band constructed using overall model accuracy during an out of sample test period.

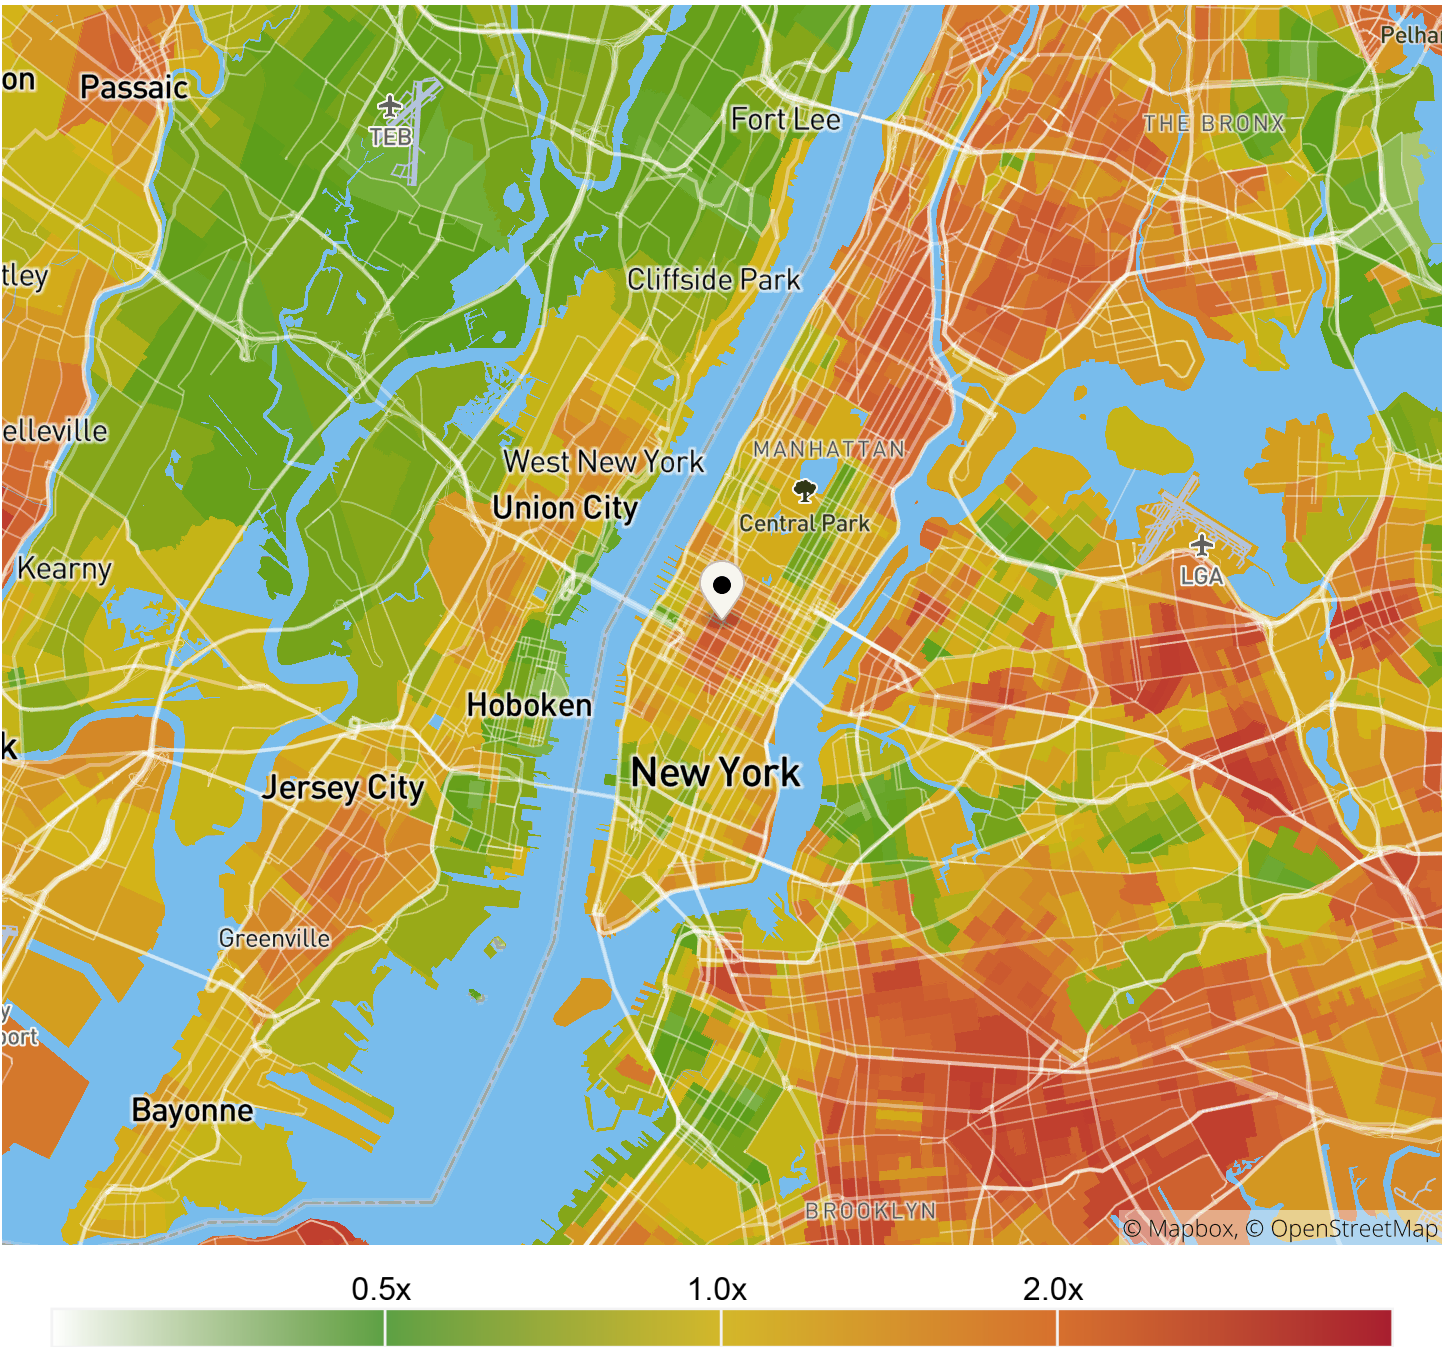

# TOTAL CRIME RISK: NEIGHBORHOOD SCALE

CRIME SCORE

2.1x

Total crime risk in your neighborhood is 2.1 times the national average. The map shows total crime risk for a set of neighborhoods surrounding your address. Light shades of green indicate low crime risk, while yellow, orange and red indicate areas with increasingly higher risk. We use observed crime counts in space together with data on a wide variety of neighborhood characteristics to estimate crime risk at a finer spatial scale. Your address is indicated by the white and black marker.

ADDRESS: TIMES SQUARE, NEW YORK

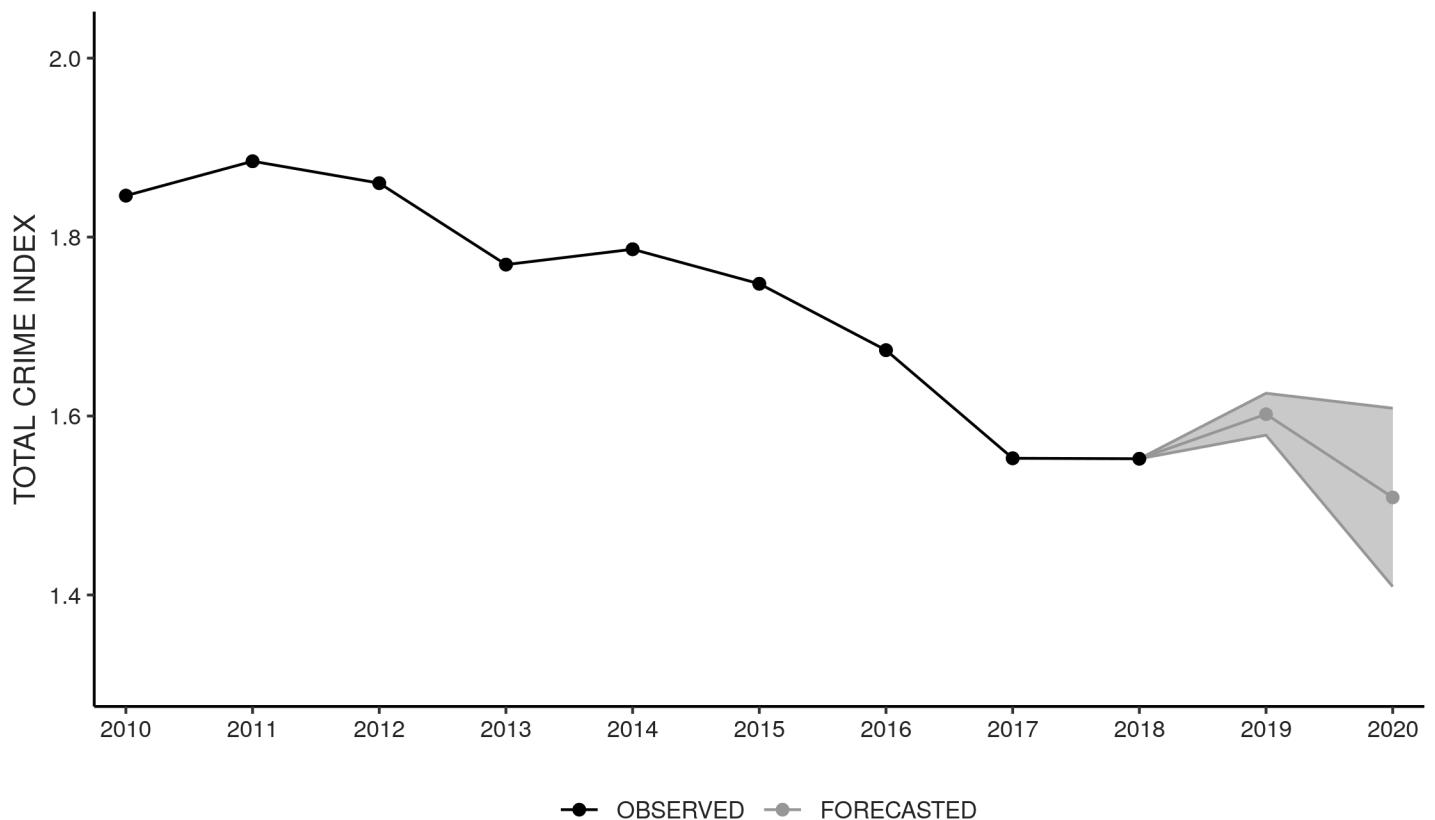

# TOTAL CRIME RISK: COUNTY SCALE

CRIME SCORE

1.5x

Zooming out, your address is situated in New York County. Total crime risk in New York County is 1.5 times the national average. The graph plots past and (forecasted) future total crime risk in your county. The shaded area shows the 95-percent confidence band for forecasted risk.

## NEW YORK COUNTY TOTAL CRIME RISK OVER TIME

## YEAR-OVER-YEAR CHANGE

Total crime risk in New York County has **decreased by 6%** over the last year.

## PERCENTILE RANK

**74 percent** of U.S. counties have lower total crime risk than New York County.

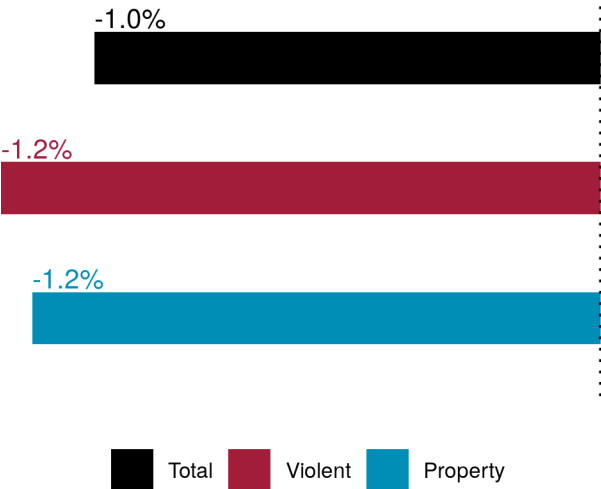

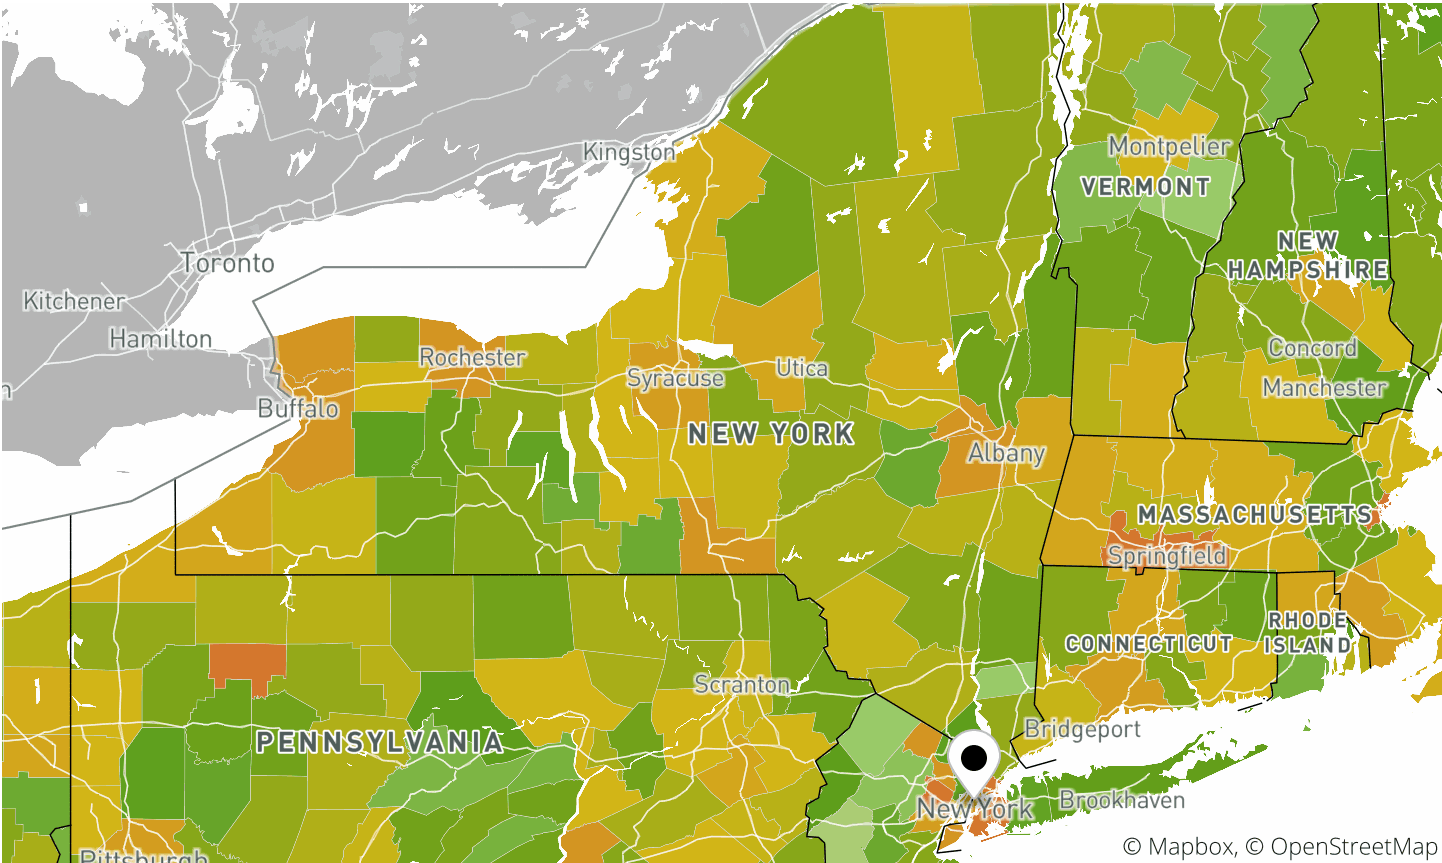

# TOTAL CRIME RISK: STATE SCALE

CRIME SCORE

1.3x

Total crime risk in New York is 1.3 times the national average. The map shows total crime risk for the surrounding counties that make up your state. Light shades of green indicate low crime risk, while yellow, orange and red indicate areas with increasingly higher risk. Your address is indicated by the white and black marker.

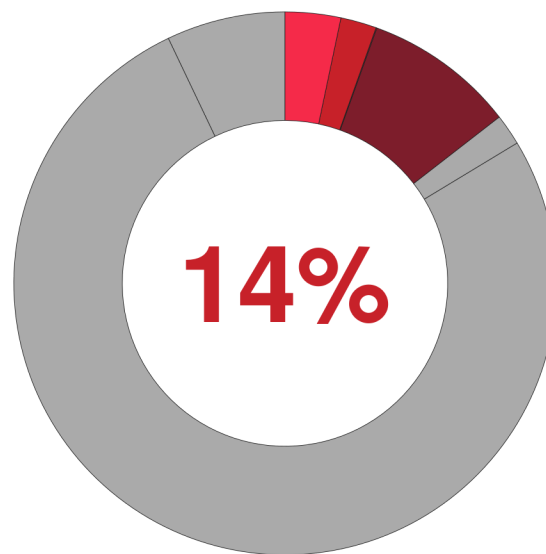

## YEAR-OVER-YEAR CHANGE

The bars show percent change of total, violent, and property crime risk in New York over the past year.

### VIOLENT CRIME

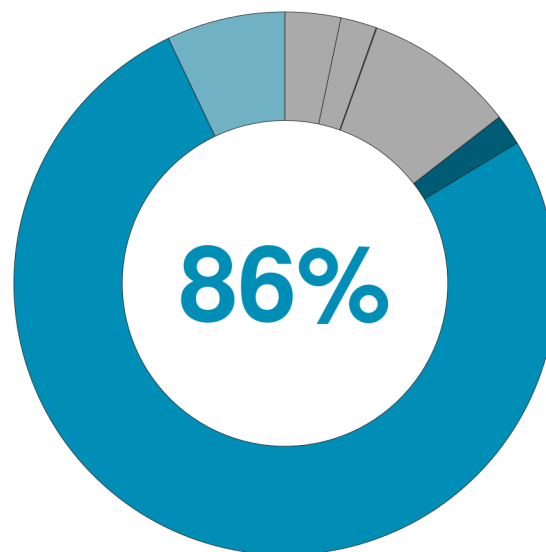

15 percent of all crimes in New York are violent. This includes assault, murder, rape, and robbery. Assault is the largest subcategory of violent crime in the state.

Assault Murder Rape Robbery

### PROPERTY CRIME

85 percent of all crimes in New York involve damage or theft of property. This includes burglary, larceny and motor vehicle theft. Larceny is the largest subcategory of property crime in the state.

Burglary Larceny MV Theft

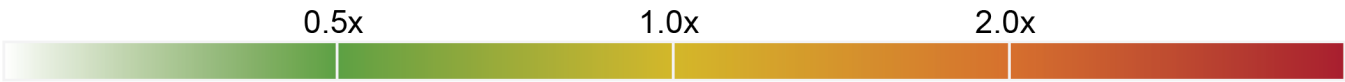

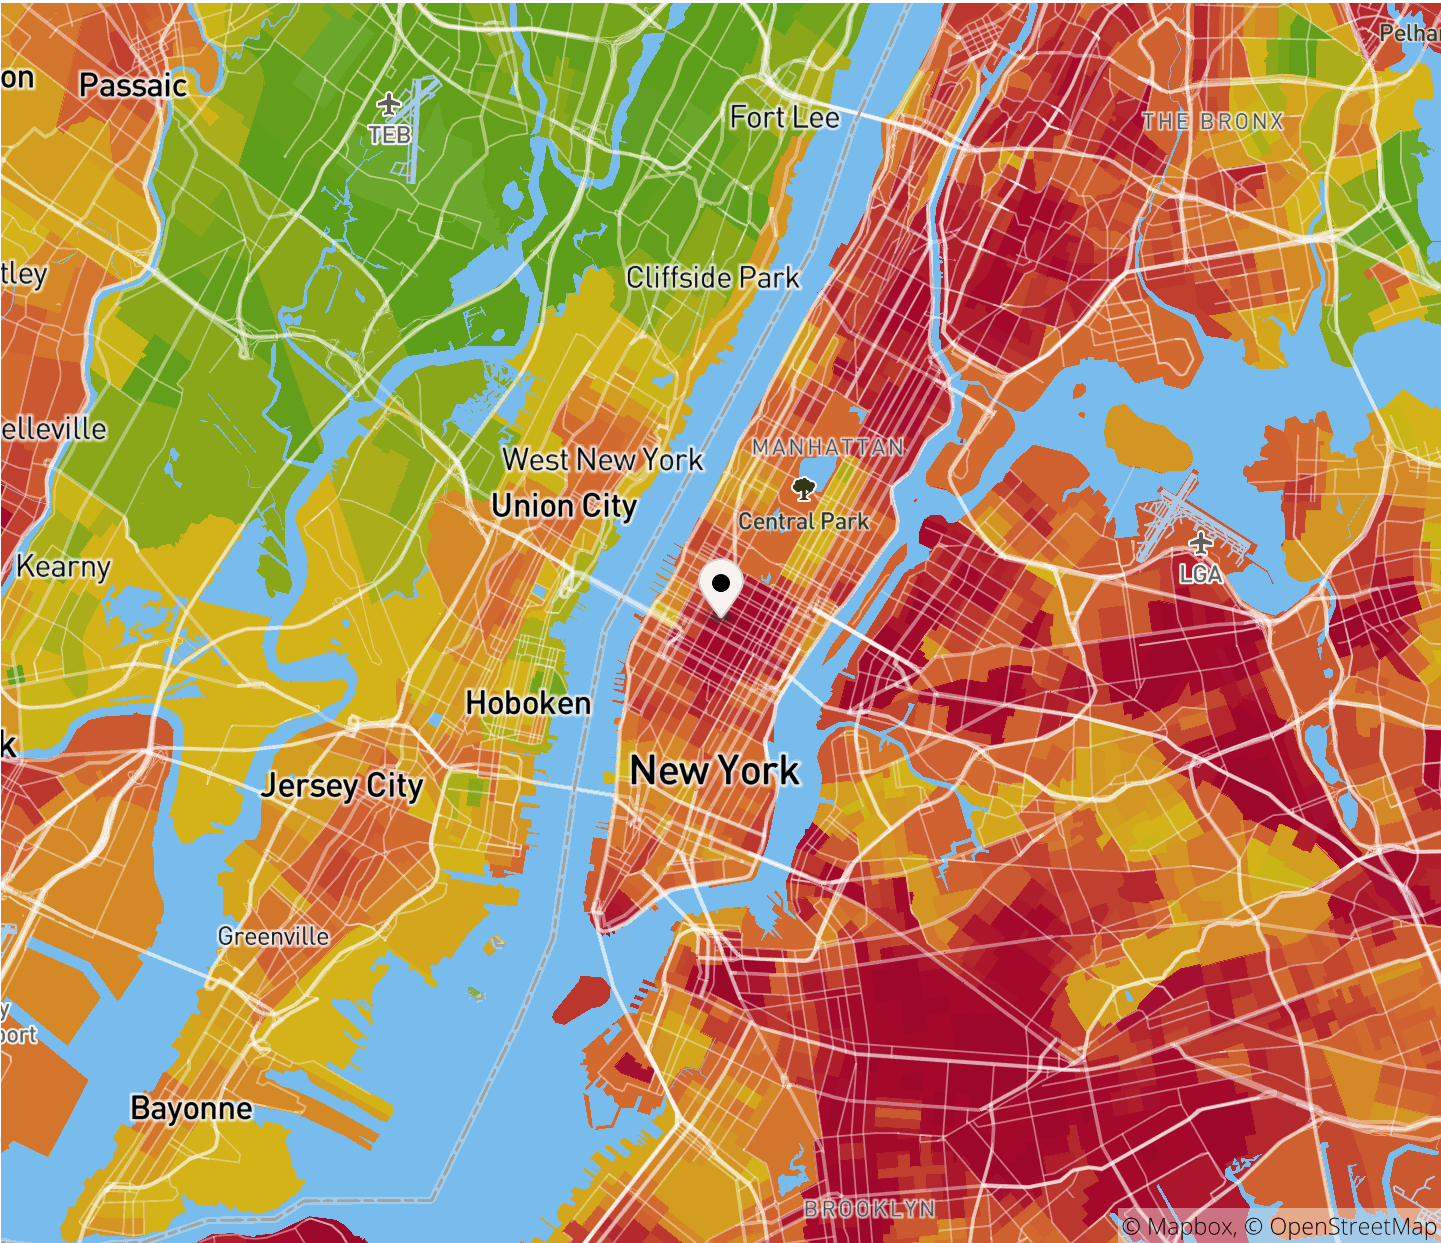

# VIOLENT CRIME RISK: NEIGHBORHOOD SCALE

CRIME SCORE

4.4x

Violent crime risk in your neighborhood is 4.4 times the national average. In the map, light shades of green indicate low crime risk, while yellow, orange and red indicate areas with increasingly higher risk. Your address is indicated by the white and black marker.

ADDRESS: TIMES SQUARE, NEW YORK

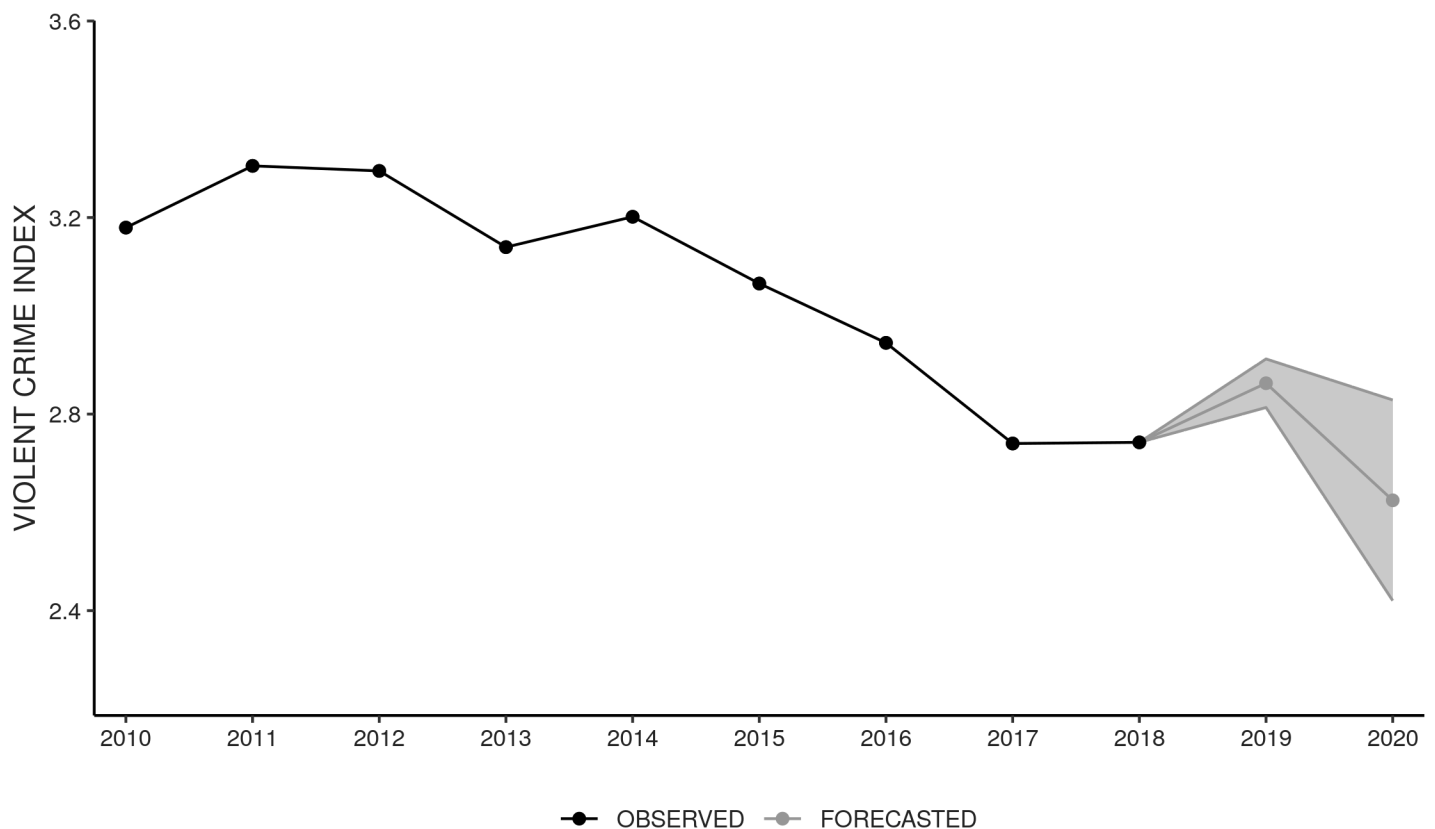

## VIOLENT CRIME RISK: COUNTY SCALE

CRIME SCORE

2.6x

Violent crime risk in New York County is 2.6 times the national average. The graph plots past and (forecasted) future violent crime risk in the county. The shaded area shows the 95-percent confidence band for forecasted risk.

NEW YORK COUNTY VIOLENT CRIME RISK OVER TIME

### YEAR-OVER-YEAR CHANGE

Violent crime risk in New York County has **decreased by 8%** over the last year.

### PERCENTILE RANK

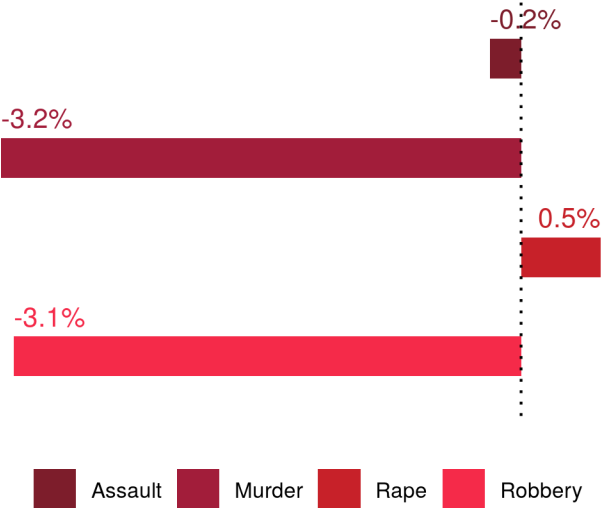

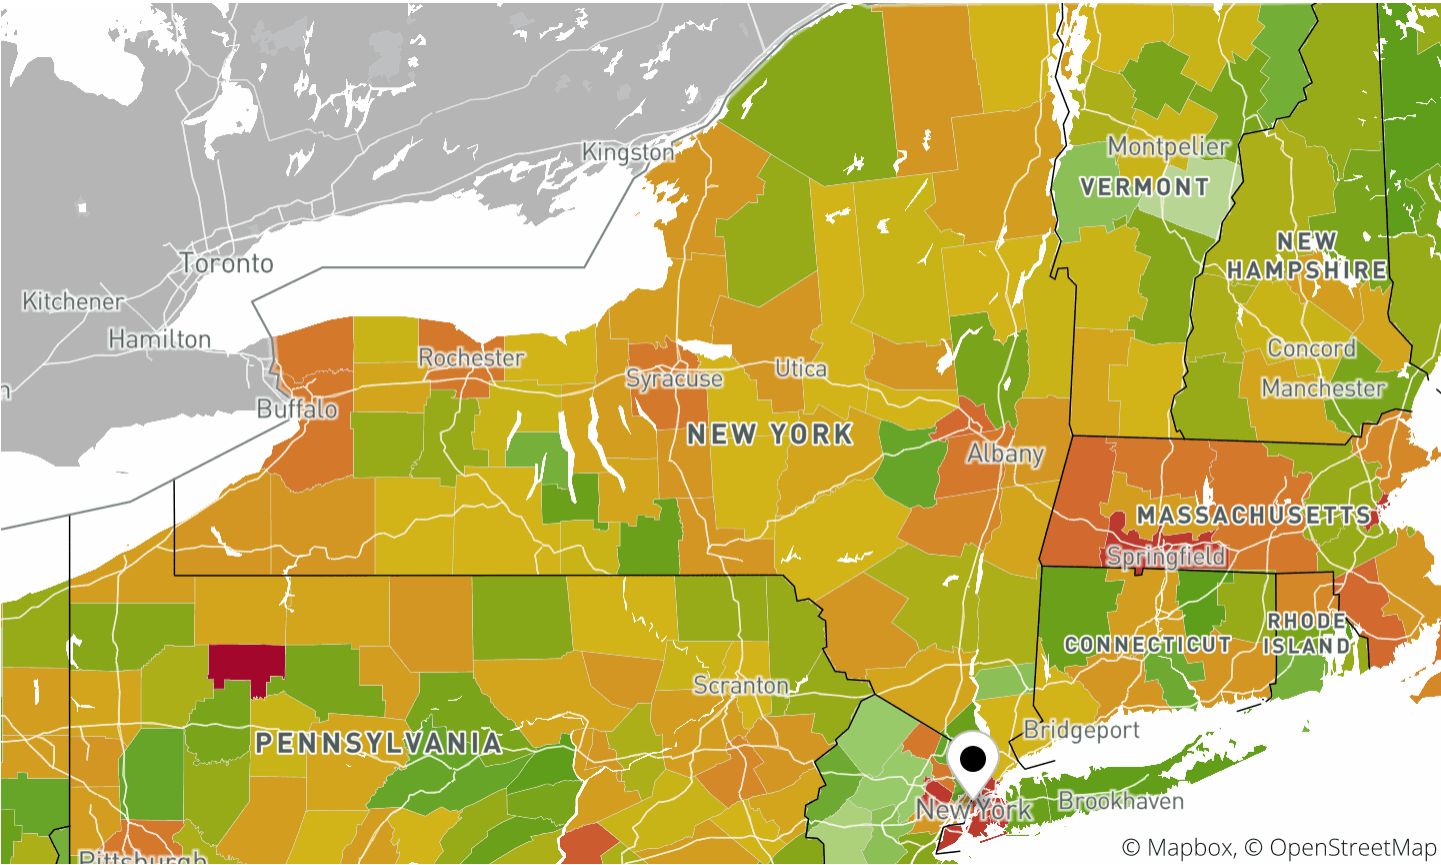

**86 percent** of U.S. counties have lower violent crime risk than New York County.

# VIOLENT CRIME RISK: STATE SCALE

CRIME SCORE

2.0x

Violent crime risk in New York is 2.0 times the national average. In the map, light shades of green indicate low crime risk, while yellow, orange and red indicate areas with increasingly higher risk. Your address is indicated by the white and black marker.

## YEAR-OVER-YEAR CHANGE
