

# People Safety at your Fingertips

**Confident business operations — from  
anywhere in the world**

# Pinkerton WARNE is Refined People Safety Intelligence & Management

In an ever-changing threat landscape, organizations turn to cutting-edge technology to ensure their employees' safety as they work from home or travel the world. WARNE is the comprehensive people safety and security solution you need. Created specifically to keep your employees safe, and your company thriving with its sophisticated and lightning-fast emergency response systems.

Consistently evaluate your next steps through our comprehensive app-based, people safety, location security, and crisis management program operating in real-time.

## Dive into Our Features

Our client-centered approach allows managers and employees to receive updates regarding current events on-site or in future destinations. Our features include:

### Check-In Button

Employees can report position manually or according to company policy upon arrival in a new country.

### Travel Booking Integration

Allows Pinkerton clients in-app to receive pre-trip alerts of upcoming events, current events, and critical situations. Access flights, car rentals, and hotel bookings information. Get updates about modified travel plans, delays, gate changes, and more.

### Alert Feed

Browse up-to-date, tailored reports on current and local issues. Get consistent information and understand trends in real-time.

### Useful Information

Receive security and medical information as well as practical travel information about language, culture, climate, visa requirements, currency, and more.

### Translation

Immediately translate WARNE's information into 42 languages.

### Incident Management

Easily visualize your facilities, employees, and incidents all in one operating picture. Create specific communication groups, broadcast decisive information, identify missing or OK employees, coordinate escalations, and emergency response plans all from your GSOC or as an outsourced service through our 24/7 GSOC.

## Exclusive COVID-19 Features

Stay in the know with WARNE's dynamic Global Restrictions Map and pinpoint COVID-19 restrictions applying in different locations. Use our extensive Quarantine Map to identify quarantined areas and dive into our Infection Intensity Map to plan future travels strategically by recognizing potential risks and obstacles.

Plus, with WARNE's **Employee Exposure Tracking**, you can see your organization's possible exposure to all reported COVID-19 cases in 5,000 regions, worldwide. Make strategic decisions and keep your staff safe through unprecedented times now and in the future.

## Dynamic App Alerts

Never miss a thing. WARNE's alert page delivers data regarding employees' current locations and includes local news updates from multiple sources. **View these in three priority levels:**

### High/Red

Immediate and serious threats to safety/health.

### Medium/Orange

Incidents or threats that have recently occurred or are currently happening.

### Low/Green

Useful information such as public transport disturbances or previous security warning updates.

## Personalized Pinkerton Vigilance Alerts

In addition to WARNE's global alerts, users may receive Pinkerton Vigilance Alerts through the app, including:

### 24/7 Near Real-Time

The Pinkerton Vigilance Network serves tailored alerting to users depending on needs, locations, and itinerary.

### Points of Interest

Depending on where you or an employee is located, receive intelligent alerts on a focalized level like neighborhoods, cities, or states.

## Global Monitoring & Response

Not only can you access dynamic mapping, world-wide granular analysis, and receive comprehensive incident data, WARNE also gives clients immediate access to Pinkerton's Global Security Operations Center — with a press of a button.

- Place a call to the GSOC
- Automatically notify managers within Pinkerton or its clients regarding an emergency call
- Send caller details, including position, and enable quick and customized responses

Your employees are connected through WARNE's renowned situational awareness system. Easily create specific communication groups, broadcast decisive information, identify missing or OK employees, coordinate needed escalations, and emergency response plans all from your GSOC or as an outsourced service through our 24/7 GSOC.

## Pinkerton WARNE's Refined Employee Risk Solution

When it comes to your company, take no false steps. With our modern-data technology, you can make informed decisions and operate with confidence from anywhere in the world.
